

Identify Software Version

Document ID: H02B0509

Objectives:

Identify/Locate Current Software Version

Applicable Multicam version: All

Identify/Locate Current Software Version

1. On Windows desktop, click on Start, select My Computer

Administrato	r
	😡 My Computer
	Section 2015 My Network Places
	Control Panel
	P Search
	700 Run
All Programs 📡	
	Log Off 🚺 Turn Off Computer
l start	

✓ If you have a My Computer shortcut on your desktop, you may also access My Computer directly via the shortcut

2. Browse the hard drive which GeoVision software was previously installed in

- ✓ If you have not changed the default location, the default drive is C:/
- 3. Locate and browse GVxxx folder. (GVxxx model number depends on your card model selection when first installed)

		Name	Size	Туре	Date Modified
System Tasks	۲	Configuration Settings			
Hide the contents of the drive	is		1 KB	Configuration Settings	11/28/2006 4:41 PM
Add or remove program	ns	File

- The GVxxx.exe should have an icon that looks like an eye
- 5. Select Version tab, then software version can be located next to File version

6. If GVNVR is used, File version can be located under Details tab
