

Barcode

Document ID: A02B1208

Objectives:

Identify and Locate the GeoVision Product Barcode

What is the Product Barcode?

Where can I find the Product Barcode?

What to do when I cannot locate my product bar code?

What is the Product Barcode?

A barcode is a set of 12 digits that contain shipping related information. When the barcode is provided for supports and services, it helps our staff to track the model of the capture card that was shipped with the specified barcode. This allows us to ensure that our service is always provided to GeoVision users.

Where can I find the Product Barcode?

When GeoVision ships out its products to clients, barcode stickers will be placed on the following items:

- ✓ User Manual
- ✓ Product Box
- ✓ Software CD
- ✓ Video Capture Card

✓ User Manual

✓ Product Box

✓ Software CD

✓ Video Capture Card

What to do when I cannot locate my product bar code?

If you are unable to locate the barcode from any source above, please provide additional information such as clear pictures of the video capture card (one front side and one back side pictures) in order to allow our staff to identify the product and gather information on the product
