- GV-Mobile Server V1.4.0.0
- GV-Redundant Server / GV-Failover Server V1.0.1.0
- GV-GIS V3.1.0.0

How to Install Patch Files

To connect to the new GV-IP devices listed above on the GV-Software listed above, patch files are required. There are two ways to obtain the patch files:

- Download the patch files from the link below and unzip the downloaded file.

  http://ftp.geovision.tw/ftp/AlexHuang/patch/20121218/IPCamera_Patch.zip

- Insert the supplied Software DVD and click the **IP Camera Patch Files** folder.

There are two folders in the patch folder: **GV-Folder** and **Windows**. Follow the steps below to install patch files.

1. Copy the content of the **Windows** folder and paste them in C:\WINDOWS\.

2. For GV-System, GV-Control Center and GV-Recording Server, copy the content of the **GV-Folder** folder and paste them in the GV-Software folder.

3. For GV-GIS, open the **GV-Folder** folder and copy **IPCamAutoDetect.dll** to the GV-GIS folder.

4. If a message pops up to inform you a file with the same name already exists in the folder, click Yes to replace the existing file.

5. Restart the GV-Software.
