Make Every Installation In Reach

Surveying and comparing specifications and prices can be tedious. Save your time with the Target Series, which consists of IP camera models that deliver quality with outstanding price-to-performance ratio.

All three models in the current Target Series lineup, including GV-EFD1100, GV-EBX1100, and GV-EBL110, are equipped with intelligent IR for night vision, defog feature, tampering alarm, privacy mask for condition alerts, and are em-

bedded with full-featured 32 channel GV-NVR software. These light-weight model are easy to install and are well designed for both power and practicality.

The Target Series is a well-executed return to basics that stands true to our commitment to quality while staying budget-friendly. It is the perfect compliment to GeoVision's existing line of high mega-pixel and high performance models to keep every installation in reach.
