

# **CONFIGURATION TUTORIALS**

# How to setup your camera for a hallway

## 1. SET YOUR CAMERA IN THE PROPER DISPLAY POSITION FIRST

---

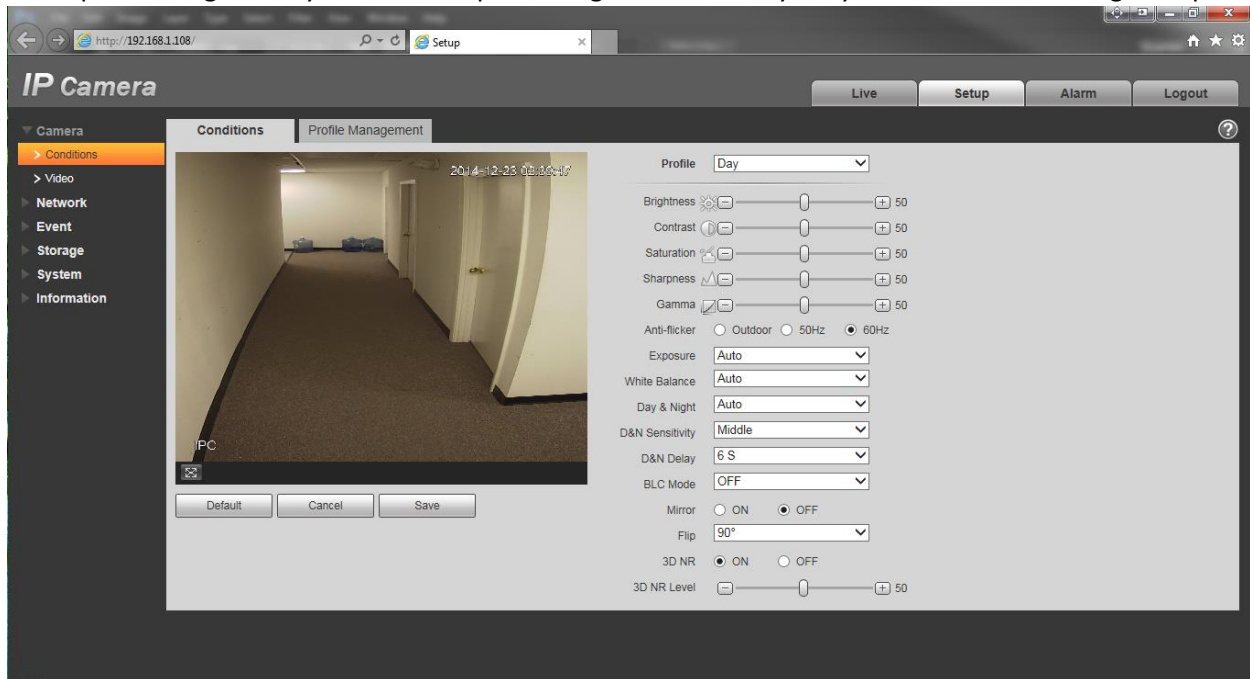

And make sure that the image looks ok normally from the normal mount position.

## 2. ROTATE THE CAMERA LENS 90 DEGREES

First open the camera on a local web browser and log in then go to Setup > Camera > Conditions and set the Flip to 90 Degrees. If you need to flip the image the other way set your camera to 270 degree flip.

Once you have made sure that the flip is on rotate the camera lens to straighten the video out.

### 3 YOUR FINAL VIDEO
