

Enclosure Options

For the HandPunch Series

Schlage biometrics provides various options to protect your HandPunch from the elements. Three different, proven solutions are available to ensure your HandPunch keeps performing regardless of your environment.

HP-RW

HandPunch with Standard 256 User Memory

Ideally suited for outdoor environments, the HP-RW is constructed of heavy-gauge zinc-coated steel. It features a sealed keypad, low-temperature display and a heated interior. This is a fully integrated unit and comes complete with a HandPunch and an internal heater.

FX Enclosure (FX-ENCL) / GX Enclosure (GX-ENCL)

HandPunch Enclosure

Constructed from high impact UV resistant polycarbonate material, the FX Enclosure provides a degree of protection against dusty, dirty, or rainy environments. This enclosure has been designed so that it can be added to an existing installation. When used with an integrated heater option (INT-HTR/INT-HTR-G), it provides a comfortable heated platen in a cold climate.

TX Enclosure (TX-ENCL)

HandPunch Enclosure

The TX Enclosure provides a higher degree of protection against dusty, dirty, or rainy environments. When used with an integrated heater option (INT-HTR), it provides a comfortable heated platen in a cold climate.

HP-RW

FX Enclosure /GX Enclosure

TX Enclosure
