

StealthLock))) - Keyless, Invisible Electronic Cabinet Lock

stealthlock.com

StealthLock works via radio frequency which allows wireless locking of multiple cabinet openings.

The **Transmitter Pad** broadcasts the code entered to lock or unlock the cabinet door or drawer.

The Transmitter Pad can mount anywhere within 15 feet of the Receiver Latch without wires.

StealthLock is recommended for use on cabinets made from:

- Wood and wood products
- Phenolic Resin
- Glass

The **Strike Plate** is mounted on the door or drawer to be locked and interfaces with the Receiver Latch.

The **Receiver Latch** mounts inside the cabinet, hidden from view and receives lock or unlock instruction from the Transmitter Pad.

COMPONENTS

TP-100 – Transmitter Pad

- Operates with CR2032 coin battery, included
- Low battery indicator

Available in two versions:

Standard – Use for most residential and general commercial applications

Dedicated – Use part number TP-150, special factory order, unique Transmitter Pad ID mates a Transmitter Pad to specific Receiver Latches. Ideal for lockers or users within close proximity of each other.

RL-100 – Receiver Latch

- Programmable using Transmitter Pad
- One required per door or drawer
- Mounts within 1/2" drawer suspension
- Operates with 4 AAA batteries

SP-600 – Strike Plate

- For door and drawer use
- Fits within 1/2" drawer suspension

TL-600 – Installation Tool

- Use to mount Receiver Latch and Strike Plate
- Included with the SL-100 and RL-110 kits

KITS

SL-100 – StealthLock Kit

- Contains all parts necessary to lock one door or drawer
- Kit includes:
 - ♦ RL-100 – Receiver Latch
 - ♦ TP-100 – Transmitter Pad
 - ♦ SP-600 – Strike Plate
 - ♦ TL-600 – Installation Tool
 - ♦ required mounting screws

RL-110 – Receiver Latch Kit

- Contains all parts necessary to lock additional doors or drawers operated by existing Transmitter Pad
- Kit includes:
 - ♦ RL-100 – Receiver Latch
 - ♦ SP-600 – Strike Plate
 - ♦ TL-600 – Installation Tool
 - ♦ required mounting screws

Dedicated version

SL-150 Dedicated Preprogrammed Kits

For medium to large projects

Transmitter pads and receiver latches can be programmed at the factory to a customer-provided schedule. They are then ready for installation. If needed, StealthLock's modes (passage, self-locking and single use) can be reprogrammed after installation.
