## Product Announcement:  L-Series with LED Notification Appliances

October 2023
Bulletin M23.2SS

System Sensor is pleased to announce the next generation of L-Series audible visible notification appliances with the availability of L-Series with LED indoor strobes and horn strobes. New LED lighting technology offers an average of 40% lower current draw compared to older xenon bulbs across a full candela range. This improves design flexibility for notification appliance circuits (NACs) while also reducing power supply requirements allowing for simpler and lower cost installations.

In addition, the System Sensor L-Series with LED notification appliances offer a new diagnostic test point feature that allows you to measure device voltage with a digital voltage meter (DVM) without removing the appliance from the wall or ceiling. The DVM test points are discreetly located on the face of the notification appliance and enable faster troubleshooting and end of line (EOL) voltage checks while greatly reducing the risk of misplacing or damaging appliances during troubleshooting.

### L-Series with LED Technical and Design Features:

- 40% lower current draw (on average) reduces power supplies and allows more devices per NAC
- DVM test points eliminate the need to remove appliance from wall or ceiling to measure voltage
- Unmatched application versatility with:
    - Wall and ceiling-mount models
    - Standard and compact sizes for wall applications
    - Red or white color options
    - Common LED lenses
- Compatibility with legacy System Sensor SpectrAlert, SpectrAlert Advance and L-Series notification appliances for retrofit applications
- Common L-Series design aesthetic for continuity with existing L-Series installations
- Dual-listed with both UL and ULC certifications

Additional L-Series appliances including indoor speaker strobes and chime strobes as well as outdoor strobes, horn strobes and speaker strobes will convert to the new L-Series with LED platform in early 2024. Look for future launch announcements for the availability of these additional L-Series with LED devices coming soon.

**The L-Series with LED indoor strobes and horn strobes are available to order now!** Please contact your Customer Service Representative at 1-800-736-7672 or fire.custserv.us@honeywell.com for ordering and pricing information or visit systemsensor.com for more information.

*Please note the legacy L-Series strobes and horn strobes will continue to be offered until December 15, 2023 or while supplies last, with a 15% price increase effective November 15, 2023.*
