## **Regulatory information**

Europe

This product complies with the applicable CE marking directives:

- Radio Equipment Directive (RED) 2014/53/EU. See *Radio transmission on page 3*.
- Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU and 2015/863, including any amendments, updates or replacements. See *Disposal and recycling on page 5*.

A copy of the original declaration of conformity may be obtained from Axis Communications AB. See *Contact information on page 6*.

## **Electromagnetic compatibility (EMC)**

This equipment has been designed and tested to fulfill applicable standards for:

- Radio frequency emission when installed according to the instructions and used in its intended environment.
- Immunity to electrical and electromagnetic phenomena when installed according to the instructions and used in its intended environment.

## **USA**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The product shall be properly grounded.

## Requirements for compliance with UL294 7th edition

This section contains information and instructions required for UL compliance. To make sure the installation is UL compliant, follow the instructions below in addition to the general information and instructions provided throughout this document. In cases where pieces of information contradict each other, the requirements for UL compliance always replace general information and instructions.

For use with the UL294 listed AXIS A1601 Network Door Controller.

### *Safety instructions*

- The Axis product shall be installed and serviced by a factory trained professional.
- All wiring methods shall be performed in accordance with ANSI/NFPA 70, local codes and authorities having jurisdiction.
- Recommended test method: Verify that the card reader reads cards and provides access.  
Test frequency: once a year.
- There are no replacement parts available for this product.
- For UL294 compliant installations the AXIS A4120-E Reader should be powered by either an AXIS A1601 Network Door Controller or a UL294 listed power supply. All interconnecting devices shall be UL listed and Class 2 low-voltage power limited.
- DC input evaluated for UL294: 12 V DC
- Max current: 120 mA
- Max wiring length: 1000 m (3281 ft)

### *Impaired operation*

The following conditions could result in impaired operation of the reader:

The reader can have difficulties reading cards at very low temperatures. The access cards are normally specified to -35° C (-31° F) and should be

warmed up if the reader is installed in cold surroundings. The reader can only read one card at a time. Sheet metal behind the access card can result in impaired antenna function and prevent the reader from reading the card. Too low voltage will impair the function of the reader.

### *Firmware version*

AXIS A4120-E Reader has been tested for compatibility with the UL294-listed AXIS A1601 Network Door Controller employing major firmware version 1. Equivalent to other Axis door controllers with major firmware version 1, as well as UL component version 1 in other Axis door controller firmwares.

### **Performance levels for access control**

This section contains performance level information required for UL 294 compliance.

Feature	Level
Destructive attack test	I
Security	I
Endurance	IV
Standby power	I

### **Wire area**

#### **Note**

Each wire shall have a conductor cross-sectional area that corresponds to an conductor gauge range of AWG 22–18. Select cables in compliance with your local regulations.

# AXIS A4120-E Reader with Keypad

---

AWG	Diameter mm (in)	Area mm <sup>2</sup>
