

Comelit.

FROM THE BEGINNING.

Since 1956, we have been making history in the door entry phone and door entry monitor sector and have actively contributed to its **ongoing** development. Over the years, the experience gained in this specific sector when it comes to meeting installation **requirements**, such as simplicity, reliability and multiple functions, has allowed us to grow and make a name for ourselves as an **international benchmark company**.

Our **values** and our business **vision** are the foundation upon which we have developed a well-run, well-structured global organization, with **10 branch offices** abroad, more than **800 employees**, **6 R&D centers** and a commercial presence in **over 90 countries**.

In addition to video door entry systems, we design and build anti-intrusion, video surveillance, home automation, fire protection and access control systems, which makes us a single partner specializing in protecting people and their environment.

WITH YOU ALWAYS

With You. Always.

OUR PROMISE, OUR COMMITMENT.

Being **close** to those who choose Comelit for their customers is our daily **commitment**. Our commitment is demonstrated by the fact that we are constantly researching and developing new, easy-to-install, high-performance solutions and offering daily advice and **assistance** on the phone and on-site, as well as extremely reliable products and systems of the highest quality, **supporting you step by step in your work**. With You. Always. Because **your success is our success** and your satisfied customers are our satisfied customers.

MyComelit.

THE APP YOU WON'T BE ABLE TO LIVE WITHOUT.

Simple, straightforward and customized. Thanks to all the services provided, MyComelit makes work easier for all industry professionals: installers, integrators, developers and property managers.

- Quickly browse through all the technical, application-related and commercial information concerning our products (catalogs, manuals, technical data sheets, etc.)
- Manage and monitor your connected systems and receive notifications on the status of installed products to receive prompt assistance and reduce downtime.
- Enter the names of the Ultra entrance panel (in the Touch or digital Directory versions) via Bluetooth connection.
