## Access Central™ – PAC management software (from version 5.4.0 onwards)

Access Central™ is a powerful software management platform designed to support businesses from commercial, educational, military and blue-light sectors. It comes complete with access control, and building management features and capabilities dedicated to supporting a wide range of security applications.

- Comprehensive access control management by keyholders, doors, areas and access groups.
- Easy building management expansion including lift control, monitoring / controlling 3rd party equipment, and alarm management.
- IT friendly deployment onto Windows based servers utilising Microsoft AD, web browser access and more.
- Enhanced security and safety using PAC's Event To Action engine for proactive responses.
- Monitoring and alarm management for all access control events and reporting.
- 3rd party Integration options with pre-built configurations or via our API.
