Uplink® 2550-CB

UL Listed GSM Alarm Communicator for Commercial Security

UL Listed and bank-vault security rated, the Uplink 2550-CB alarm communicator delivers full-event reporting and complete end-to-end signal verification for backup to landline connections. Designed for commercial applications, the Uplink 2550-CB is compatible with virtually all security system panels and supports all common event reporting formats. Installation is remarkably easy, with no additional programming or central station equipment required. Instant onsite activation is available through the Uplink dealer website or live operator, and includes options for automatic, daily or weekly test signals. The Uplink 2550-CB offers unparalleled value, and is backed by Uplink's dealer support program.

A Trusted Partner

The Uplink 2550-CB is a member of the Uplink family of wireless alarm communicators. Our products deliver the unique combination of reliable technology and superior value that has made Uplink the security industry's most trusted source for alarm communicators since 1996. GSM or CDMA protocols, primary or back-up applications, summary or full data reporting, there is an Uplink wireless alarm communicator for virtually any security system on the market today. With hundreds of thousands of installed communicators throughout the United States and Canada, Uplink delivers on its promise as the security dealer's trusted partner.

Plus, Uplink wireless communicators are backed by the unique combination of the proprietary ISO-27001 certified network service offering and a robust dealer web management tool.
