

Overview

The Component Video Hub allows one (1) full component video (YPbPr/RGB) source and one (1) digital or analog audio source to be distributed up to eight (8) or sixteen (16) destinations depending on the model for more cost-efficient cabling. The 500250 and 500252 support up to eight (8) or sixteen (16) ports respectively. The hub works in conjunction with the 500050, 500051, 500052, 500053, 500054, 500055, 500056 and 500057 baluns.

Applications

Digital signage, boardroom systems, residential and commercial multi-display systems, classroom training, retail systems, electronic billboards, electronic signs, video kiosks, point-of-sale displays, in-store video.
