1. The A3WALLARM accommodates a larger range of image sizes, from 60" to 100". For the range from 70" – 100" we have included a telescoping component to the arm. For the 60" – 70" range, this piece is not needed.

2. The size of the channel (arm) itself has been increased to provide more internal cord management space (from 2.5" x 1" up to 3" x 1.5").

3. The adjustment knobs of the A3WALLARM have a larger thread, making the adjustment easier to control.

4. The A3WALLARM is, overall, 4" longer, in order to accommodate the depth of a chalk tray.

5. The A3WALLARM has added vertical height adjustment on the wall plate bracket.

## Complete Specifications

**Part Number:** A3WALLARM

**Load Capacity:** 40lbs

**Swivel:** +/- 2.0°

**Pitch:** +/- 4.7°

**Roll:** +/- 5.0°

**Throw Distance:** 4.7"-18.0"
