relationship, extended lip is available, specified by last ▼ Faceplate

Measures 1-1/4" x 4-7/8". Faceplate is flat, with sauare corners. Available in a wide range of architectural finishes.

▼ Fail Safe/Fail Secure

Field convertible from one mode to the other. However, AC intermittent solenoid must not be used continuously in either.

Function

dash number.

Remote electrical control of any door equipped with cylindrical (key-in-knob/lever) type latchsets listed above. Electrical actuation unlocks strike jaw, releasing latchbolt, so door can be opened without operating latch itself. Extremely compact mechanism fits into jamb sections as shallow as 1-5/8". Fits existing preps for 7840AN and 7850/7040.

INSTALLATION

STANDARD PACKAGE

Individually boxed with mounting screws. Includes mounting brackets and adhesive shims for use where welded tabs are omitted.

OPTIONS

Available with two monitoring signal switches which sense whether latch bolt is in strike and whether strike jaw is blocked. Choice of voltage in AC and DC for intermittent or continuous duty. Available with extended strike lip (see chart). Specify assembled for either fail-secure (locked when unpowered) or fail-safe (locked when powered) operation, but can be fieldconverted to the other mode.

4603 Rectifier - Converts AC to DC, installs in low voltage line between transformer and strike. Rated 2 amps. (200 PIV).

4605 Transformer - Converts 120VAC to 24VAC. Rated 40 Volt-amp output assures plenty of power for strike release. Patented mounting bracket fits in knockout hole of standard junction boxes.

4606 Transformer - Plug-in version for standard wall outlet.

See separate specification sheet for more information on Strike options.
