

environmentally hardened managed Ethernet switch with
(8) 10/100TX + (2) 10/100/1000TX RJ45 or 100/1000 FX SFP ports

Description

The ComNet™ CNGE2FE8MSPOE Managed Ethernet Switch provides transmission of (8) 10/100 BASE-TX and (2) 10/100/1000TX or 100/1000FX combo ports. Unlike most Ethernet switches, these environmentally hardened units are designed for deployment in difficult operating environments, and are available for use with either conventional CAT-5e copper or optical transmission media. The 8 electrical ports support the 10/100 Mbps Ethernet IEEE 802.3 protocol, and auto-negotiating and auto-MDI/MDIX features are provided for simplicity and ease of installation. All 8 ports support IEEE802.3af Class 1 – 3 based Power over Ethernet (PoE). 2 ports are 10/100/1000 configurable for copper or fiber media for use with multimode or single mode optical fiber, selected by optional SFP modules. These network managed layer 2 switches are optically (100/1000 BASE-FX) and electrically compatible with any IEEE 802.3 compliant Ethernet devices. Plug-and-play design ensures ease of installation, and no electrical or optical adjustments are ever required. The CNGE2FE8MSPOE incorporates LED indicators for monitoring the operating status of the managed switch and network.
