Beauty and Function

Press  for arm / lock
Press  then  for sensor bypass
Press  &  together for channel 3

Press  for disarm / unlock

Press and hold  for panic

Press  then  for silent arm / lock
Press  then  for silent disarm / unlock
Press and hold  for channel 2
Press  &  together for channel 4

CODEBUMP™ Technology - Defeats "Code Grabbers" by continuously changing the transmitter's code (18 quintillion possibilities).

Attractive - Like no other remote on the market today.

Ultra Thin - Just 5/16" (8mm). Fits easily in any pocket.

Great Range - Up to 200 ft.
(Up to 1,000 ft. with optional extended range antenna.)

Easy To Use - Separate buttons for lock, unlock, panic, and auxiliary output.

Feature Packed - Controls arming, disarming, panic, auxiliary output, shock sensor bypass, and chirp delete.

Extreme Durability - Rubber buttons eliminate damage caused by electrostatic discharge and help make transmitter waterproof. Gold-plated battery chips and contact points extend the life of the transmitter.

Magic LED - Only appears when buttons are pressed.

Industry's Best Shock Sensor

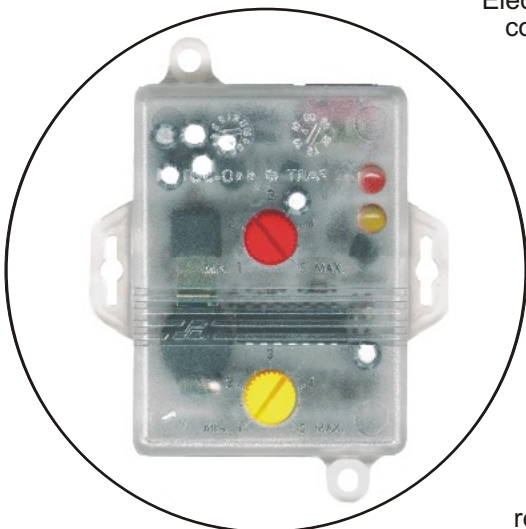

Electromagnetic technology maintains consistent sensitivity and resists condensation build-up even after years of use.

Two sensitivity adjusters make it easier to set trigger and pre-trigger sensitivities than a single-adjustment sensor.

Noise and vibration caused by thunder, airplanes, and passing traffic will not cause false alarms.

Works well regardless of mounting position. Other sensors, because of design limitations, may not work correctly when installed in certain positions.

A specially coated metal spring ensures years of reliable operation. The metal spring offers longer life, improved sensitivity control, and better resistance to external RF interference than other types of sensors. It is also resistant to excessive heat and cold conditions to add extra security.

Now Available

Full Security and Convenience

Flashing Parking Lights (Built-In Relay)

- Flash for armed, disarmed, pre-intrusion alert, sensor and zone bypass, tamper, and valet.
- Positive or negative polarity.
- Dual throw relay for European vehicles.

Door Lock (Relays Built-In)

- Lock/unlock doors via remote, even while driving or in valet.
- Separate ignition-controlled door lock and unlock.
- 2-Step door unlock output.
- Double-pulse door unlock output.

Starter Disable Output (Socket Included)

- Starter sensing triggers alarm if thieves attempt to start car.
- ASD disables starter even if alarm is not armed.

Domelight Supervision (Relay Built-In)

- Turns interior lights on for 15 seconds when disarming.

2nd Channel (Relay Built-In)

- Pop trunk or control other functions.

3rd and 4th Channel Outputs

Multi-tone Siren and Horn-honk

- Small 3-tone, 128dB siren, no "toy" sounds.
- Chirps for armed, disarmed, pre-alert, zone bypass
- Separate horn-honk output.

Super Bright, 7-function LED

- Indicates arming, armed, disarmed, valet mode, triggered zone ID and recall, and RF remote reception.

Multi-function Push Button

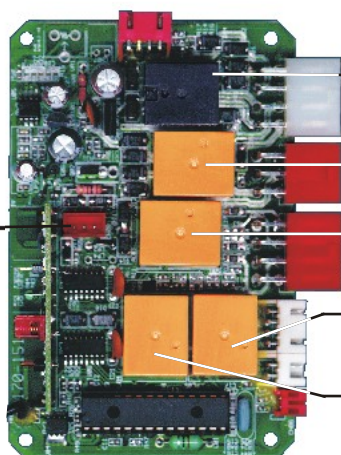

- Valet mode, emergency disarm, code learn, programming.

17 Programmable Functions

Extended Range Capability Up to 1,000 Feet

Now get up to 1,000 feet with extended range antenna. (optional)

5 On-Board Relays

FLASHING PARKING LIGHT RELAY

Handles positive or negative lighting with single or dual control.

DOOR LOCK RELAYS

No extra wires needed for almost any type of locking system.

SECOND CHANNEL RELAY

Handles heavy duty jobs like popping the hood.

DOMELIGHT SUPERVISION RELAY

For any type of door switch system, easy way to add extra security.
