[www.honeywellvideo.com](http://www.honeywellvideo.com)

Honeywell offers a real solution to variable surveillance applications with the world's first modular CCTV camera system. In just three easy steps, you can design a CCTV camera by choosing a housing, camera and lens that will best serve your unique situation. First, choose the housing. Honeywell offers its line-up of MagnaView® and PrimaView® vandal resistant camera housings for easy indoor and outdoor installation. Then, select a camera from Honeywell's assortment of standard or high resolution color or black and white cameras with true day/night resolution or wide dynamic functionality. Finally, choose your lens. Select from Honeywell's quick change lenses or Vari-focal Auto Iris lenses that deliver clear, sharp, color or monochrome images in bright daylight as well as in little or no light.

You can achieve optimum performance, quickly and economically through a combination of our proprietary CCTV modular components while designing a camera system that goes beyond the demands of the specific application.

### Market Opportunities

Today's security market is rapidly changing from part-time observation (day or night) to round-the-clock surveillance. With Honeywell's modular CCTV camera system you now have the ability to upgrade or integrate CCTV security systems affordably.
