## IK543/xS Series Apartment House Intercom Kits

The Alpha Communications® IK543/xS series intercom kits feature our most popular apartment house intercom systems and configurations, for buildings with 2 through 4 apartments, at a price that can't be beat! The 'x' in the model number indicates the kit size (2-4 apartments). Each kit contains 1- IR204E (white) indoor remote station (for each apartment), 1- PK543A intercom amplifier (with built-in electronic tone signal), 1- SS105B U.L. listed 16VAC plug-in transformer, 1- S1 Scrulox screwdriver, 1- AM512 series surface mount entry door station/panel (with 2-4 push-buttons) and 1- 200' coil of 3PRJ intercom cable (for 2 and 3 apartment systems) or 1- 250' coil of 4PRJ intercom cable (for 4 apartment systems).

Just add a 16VAC electric door opener, to complete your building security system. We know of no other system that can offer all of these features at this cost.

### FEATURES

- Simple loop wiring from indoor station to indoor station
- Built-in electronic tone signal to each indoor station
- Exceptional voice fidelity
- Easy Installation - All Surface Mount Stations
- Built-in Door Release Capability (with optional time delay)
