- Available with Smoked or Clear Bubble
- Includes Service Connector for Video Output

Camera Modules

The **IS150 Series Camclosure® Integrated Camera System** offers a large selection of camera and lens options. Available camera modules include the following:

- **Day/night wide dynamic range (WDR) and wide dynamic range:** Pelco's WDR uses a pixel-based imager that adjusts for lighting by pixel. Traditional CCD cameras adjust the entire image for lighting conditions that appear in a small portion of the image or that are not extreme. Different lighting problems occur at night. Car headlights and parking lot lights are good examples of problematic video images. Use Pelco's Day/Night WDR where you need the camera to adjust from extreme lighting to low light conditions.
- **Day/night high resolution (540 TVL)** color camera with auto iris, varifocal lens; application examples include environments that require monochrome images at night and color images during the day.
- **High resolution (540 TVL)** color camera with auto iris, varifocal lens or fixed iris lens; application examples include all general-purpose environments.

Enclosure Modules

The **IS150 Series Camclosure Integrated Camera System** combines a camera and lens package into a small, high-security enclosure for medium-security installations subject to vandalism. The in-ceiling dome is designed for suspended ceiling or recessed ceiling/wall installations. An adapter plate is supplied with the dome to mount the unit to a 4S electrical box or to provide additional support for suspended ceiling installations.

The lower dome of the **IS150 Series** is available with either a clear or a smoked bubble. Models with a clear bubble include a liner for discreet viewing. Domes may be purchased without the camera module for pre-installation or for camera bicycling.
