

Sarix® IXS0LW Series IP Cameras with SureVision

STD DEF, H.264 BOX CAMERAS WITH WDR AND LOW-LIGHT PERFORMANCE

Product Features

- Up to SVGA Resolution (800 x 600)
- Up to 30 Images per Second (ips) at All Resolutions
- Auto Back Focus
- H.264, MJPEG, and MPEG-4 Compression Capability
- Day/Night Models with Mechanical IR Cut Filter
- Wide Dynamic Range with Anti-Bloom Technology
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Web Viewing
- Local Storage (Micro SD) for Alarm Capture
- Open IP Standards

The **Sarix® IXS0LW Series** network camera is a standard definition network camera designed with SureVision technology that seamlessly delivers advanced low-light performance, wide dynamic range (WDR), and anti-bloom technology for industry-leading image quality and performance. The network camera includes a mechanical IR cut filter for increased sensitivity in low-light installations. Anti-bloom technology adjusts the image to create the best picture when a bright light source is introduced in a dark scene, such as the glaring head lights of nighttime traffic.

Designed to install quickly, the camera comes equipped with the advanced features needed for demanding security applications.

Sarix technology defines the next generation of video security imaging performance, delivering high resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making network video storage more affordable.

Camera

The **IXS0LW Series** can support two simultaneous video streams. The two streams can be compressed in MJPEG, MPEG-4, and H.264 formats across several resolution configurations. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

The **IXS0LW Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

(LENS NOT SUPPLIED WITH CAMERA)

- Motion Detection
- Audio Accessory Available

The **IXS0LW Series** features built-in Power over Ethernet (PoE) IEEE 802.3af, which supplies power to the camera over the network, eliminating the need for a separate power supply. If PoE is not available, 24 VAC can be used to power the camera.

Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IXS0LW Series. The behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

Web Interface

The **IXS0LW Series** uses a standard Web browser for powerful remote setup and administration.

Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IXS0LW Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

Systemization

The **IXS0LW Series** easily connects to Pelco IP and hybrid systems such as Endura® version 1.5 (or later), MPEG-4; Endura version 2.0 (or later), H.264; Digital Sentry® version 4.2 (or later); Digital Sentry NVs; and DX8100 version 2.0 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing to Pelco's network cameras.
