Product Data Sheet

KTA-20
CyberMount wall-arm

The KTA-20 is an integrated wall-mount bracket that allows a 7-inch CyberDome to be suspended from a wall or other vertical surface. Its innovative design provides a hidden path for video, 24VAC and RS422 data control cables. The KTA-20 can also mate with other CyberDome accessories, including the Corner-Mount, Pole-Mount and Roof-Mount Adapters. It is constructed of weather-resistant, ABS-plastic.

Standard Features

- Options for many configurations to fit your needs
- Easy installation
- Durable finish and construction
- Low cost
