TDE 100/200/600 3.0 Update

TDE 100/200/600 has been upgrade to version 3.0. Several new features requested by our Dealer Partners as well as customers have been included in these versions. Please see the Product Summary Guides that include side-by-side system comparison charts. **Please find the software upgrades located on BTSDealer.com under Technical Support > Software > TDE100/200/600.**

TDE 100/200/600 3.0 Update is available immediately. New TDE Family brochure available in PDF and Word formats.

- **IP Phone Support -** Same IP Phone support as NCP – 128 IP Phones with a total of 49 simultaneous talk paths back to the phone system.
- **SIP Feature Enhancements –** New 3rd Party SIP phone and HGT100 SIP phone features including unscreened transfers and more features.
- **CA Support –** Communication Assistant support via CA Server as well as built-in.
- **NT400 Support –** NT400 fully supported on these versions.
- **IP Cell Station Support –** The new IP Cell Station is fully supported on these versions.
- **ESVM Music on Hold –** ESVM now supports built in MoH.
- **Programming Enhancement –** FWD/DND Copy and Paste functionality added.

IP Cell Station (KX-NCP0158)

Both TDE and NCP platforms now support the KC-NCP0158 IP Cell Station. This IP-based DECT Cell Station fully supports existing DECT portable stations and integration to existing non-IP DECT cell stations. **Please find the Quick Installation Guide located on BTSDealer.com under Technical Support > Tech Manuals > Wireless.**

IP Cell Station (KX-NCP0158) is available effective March 15, 2009.

- **8 Channel Support –** 8 call user connections for 10/100 Mbps Ethernet.
- **Ideal Remote Office Solution –** The IP CS eliminates distance issues and provides for full DECT PS support at remote, branch and home office locations.
- **PoE Support –** The NCP0158 is fully PoE capable which means no special power requirements are required.
- **No Additional Licenses Required –** The IP Cell Station is compatible with Virtual IP Extensions only and requires no additional IP Extension licenses.
