

MAIN FEATURES

For off-shore or industrial applications

AISI 316 stainless steel construction

For highly aggressive environments

Weatherproof standard IP66/IP68

DESCRIPTION

The NXM housing, entirely constructed from AISI 316 electropolished stainless steel, is designed to operate in special environments such as marine, industrial, chemical and where the external conditions are highly corrosive.

The NXM housing consists of a 130mm diameter cylindrical body enclosed by two 9mm thick circular flanges. The back flange is equipped with two PG13.5 cable glands for external connections. The NXM can be equipped with a flange designed to create an air barrier in front of the glass to prevent the formation of dust deposits. With the optional air barrier, the NXFIGRU filter group is recommended, which purifies the air drawn from a compressor.

A wide range of accessories is available: heater, camera power supply, NXWBS1 stainless steel special bracket, and the possibility of mounting the VIPNX wiper and washer.

The housing can be equipped with a double heater for temperatures down to -40°C (-40°F).
