### DESCRIPTION

The OpenEye R-Series Video Management system is manufactured to provide optimized performance and usability. Built for network and hybrid video environments, the R-Series is designed to support the highly-intensive requirements of mega-pixel, multi-compression installations.

The RADIUS system also improves user productivity and maximizes central management capabilities by providing support for multi-display environments.

RADIUS software is DVR Management Software, a powerful utility that allows 100 or more DVR units to be controlled using one computer. This software allows you to view live video, search saved video, edit and configure setup on each DVR, and import maps of buildings and other locations.

The RADIUS software was specifically designed as an Enterprise software solution.

### FEATURES

- » Optimized and designed for Microsoft® Windows® 7
- » Dual or quad DVI/HDMI video display
- » Gigabit network connection
- » Two eSATA ports for easy backup to an external device
- » RADIUS multi-site administration and viewing software installed

## RADIUS MULTI-SITE VIDEO MANAGEMENT

OpenEye's RADIUS Multi-Site Management Software solution provides a complete control and administration solution for OpenEye's entire line of products.

Designed for a multiple monitor environment, the RADIUS software platform enables you to simultaneously monitor alarms, retrieve video clips, and review live video from multiple locations. RADIUS also offers a rich selection of management tools including remote administration, video backup, interactive mapping, and system configuration. RADIUS is designed to manage multiple OpenEye DVRs and NVRs from one location. Any application requiring video monitoring on one or more monitors, alarm monitoring (including visual map elements), and remote system management (health, settings, etc.) will benefit from the RADIUS Multi-site Management Software.
