The **PMCL219A** TFT LCD monitor, designed specifically for the security industry, provides high resolution display of computer signals. This monitor has a color LCD panel with a thin film transistor (TFT) active matrix. The monitor automatically adapts to the appropriate input resolution.

The **PMCL219A** provides an RGB and DVI input to support the use of digital video recorders (DVRs) and PC applications. This multimode functionality and an internal autoranging power supply makes the **PMCL219A** ideal for applications requiring an RGB and DVI display.

The **PMCL219A** features a folding picture-frame-style desktop stand, optional rack mount kits, and VESA®-compliant mounting holes to easily adapt to different wall and ceiling mounts.

The **PMCL219A** uses four long-life CCFL backlights to maintain the brightness level over time, eliminating the brightness degradation common in aging CRT monitors.

Adjustments of standard monitor display parameters are made through user-friendly, on-screen menus and front panel controls.
