SPECS AT A GLANCE

Operating Voltage12VDC
Current Capacity3 Amp
Trigger.....Positive or Negative
Dimensions.....3" x 3³/₄" x 1"

DESCRIPTION

The RPMOD module is a universal single-to-dual channel adaptor. It converts control panels with a single or common output for burglar and fire alarm to a separate burglar alarm output and fire alarm output. This allows the use of both channels of dual channel devices such as self-contained sirens, siren drivers or other alarm notification equipment (radio transmitters, strobe lights, etc.). This module will work on panels that pulse either the positive or negative output terminal.
