

SLV-960

TIME LAPSE RECORDER

SUMMARY

The SLV-960 is a time-lapse videocassette recorder. Featuring multiple recording and playback modes this VCR can perform in a variety of recording environments. Triple density recording allows a high capture rate of presented recording data as opposed to a standard time lapse recorder. Audio recording, up to 30 hours, alarm recording, power loss memory and a record check feature enable the SLV-960 to serve as the basis of recording for most surveillance systems.

Additional features include a built-in time/date generator, field/frame recording modes, repeat recording, one shot recording and jog shuttle control. The SLV-960 delivers 300 lines of resolution in color and over 350 lines of resolution in monochrome recording.

FEATURES

- Alarm recording function : 2Hr of recording time mode
- Built-In time/date generator
- Diamond like Carbon Head, 4-Head
- Super clear and nature picture
- Field/Frame recording function
