

STI Thermostat Protector

STI-9110

STI-9100S

PRODUCT OVERVIEW

Molded of heavy-duty polycarbonate material, these protective covers are recommended for areas where abuse to a thermostat is a problem. This may include vandalism, accidental damage or costly, annoying tampering by employees and others. Especially useful where thermostats are located in public areas, the device is easy to install for either flush mount applications or surface mount installations with available spacers. STI-9105 and STI-9100 are available in smoke color and clear polycarbonate. Holes in the frame allow air to circulate freely for proper operation of protected thermostats or energy sensors. An interior wall on the frame prevents objects from entering the cover.

LIFETIME GUARANTEE ON COVER

As all STI polycarbonate covers, these super tough units are backed by a lifetime guarantee against breakage in normal use. For added protection against abuse, they come complete with a lock and key assembly. The Thermostat Protectors are shipped complete with all mounting hardware.

FEATURES

- Offers excellent protection against tampering, abuse and accidental damage without affecting operation of the thermostat.
- Holes in the frame allow air to circulate freely.
- Easy and quick installation.
- Shipped complete with anchors and screws.
- For flush and surface mounted applications.
- Inner wall construction prevents tampering with dials and levers.
- Spacers available to accommodate exposed conduit.
- Typical working properties of polycarbonate are -40° to 250°F (-40° to 121°C).
- STI-9105 and STI-9100 available in smoke color and clear.
- Aesthetically appealing.
- Lifetime guarantee against breakage of polycarbonate in normal use.
