

240.0 STX-MP technical data sheet

Dedicated to being a one-stop shop for professional products, OmniMount remains on the cutting edge of product innovation. That's why we're the natural choice for any professional, industrial, or commercial application. The STX mounts are longer versions of the ST and give enclosures broader horizontal and vertical coverage ranges. The STX mounts are the most flexible of the professional OmniMounts and are truly considered problem solvers. If the enclosure is strong enough, the STX can be attached to any surface and provide a strong, flexible mount to provide coverage under the most challenging circumstances.

Product Specifications

Fits most: Bookshelf speakers

Supports up to: 240 lbs (108.9 kg)

Function: Vertical tilt and horizontal pan

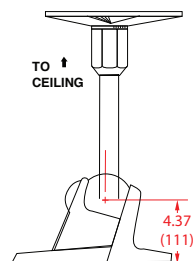

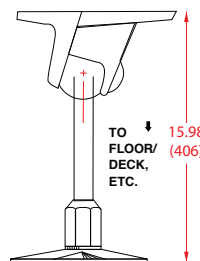

Color: Black and White

Product Benefits:

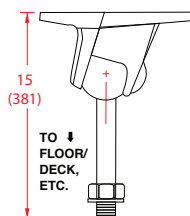

- Extended tube for broader horizontal and vertical coverage ranges
- Polymer-injected ball controls resonance frequencies for better sound
- Ball and clamp design for greater mounting flexibility
- Connects from ceiling/wall/floor to top/back/side/bottom
- Includes clamp, jaw and mounting plate
- Stainless steel hardware for strength and durability
- Suitable for all-weather use
- Includes complete Grade 5 hardware kit
