The **WG4-760** digital video recorder is a versatile and intuitive entry level recorder featuring simple setup and MPEG-4 compression.

The **WG4-760** can record video from as many as 4 cameras, in addition to 1 channel of audio. The triplex feature allows simultaneous record, playback, and networking functions, ensuring constant surveillance. Built-in digital motion detection eliminates the need for external motion hardware and sensitivity levels, along with masking areas are fully customizable. The simple OSD ensures a quick setup and easy user operation.

Complete video backup can be performed via the network client software. In addition to video backup, the client software provides off-site PC recording.

Remote viewing, setup, and playback on the **WG4-760** are available via Internet Explorer or the client software included with the unit. Video can easily be converted to the standard .AVI format for backup and review in standard media players.

The **WG4-760** also features advanced remote network options including true DDNS for dynamic IPs and email alerts.

A 160 GB hard drive generally allows continuous recording for up to 2 weeks under the most common recording conditions. However, recording time will vary depending on quality and recording rate. When all available hard disk space is consumed, the WG4-760 automatically begins recording over the oldest video.

The **WG4-760** provides for more than a simple VCR replacement. It features above standard specifications with simple setup, simple operation, and reliability.
