Version 2.1

The Comprehensive Digital Recording Solution

DIGITAL DISK RECORDERS
WJ-HD300A
SERIES

The WJ-HD300A Series offers high quality pictures and disk saving recording utilizing a new compression technology.

Panasonic presents the new WJ-HD300A Series with a unique new system featuring a high compression ratio of 1/30 for practical use. Under the "All-in-One Solution" concept, all the vital recording components and features are condensed into one unit. With one single unit, unprecedented, highly reliable surveillance recording is possible in a wide range of applications. The WJ-HD300A Series also features System Scalability to meet extended user needs.

1/30 Super Compression: Proprietary Algorithm, Core Development of the WJ-HD300A Series

- New algorithm divides entire screen into high and low frequency elements to reduce artificial distortion and noise compared to conventional compression.
- In addition, the mode-A compression data calculation within four (4) field images (called "Temporal Transforms"), outputs data according to the amount of movement: "No Movement," "Slow Speed Movement," "Medium Speed Movement," and "High Speed Movement." Redundant data can be reduced through this compression process.

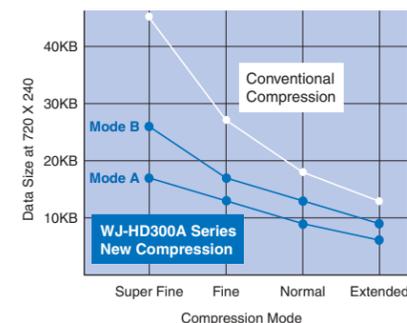

WJ-HD316A

WJ-HD309A

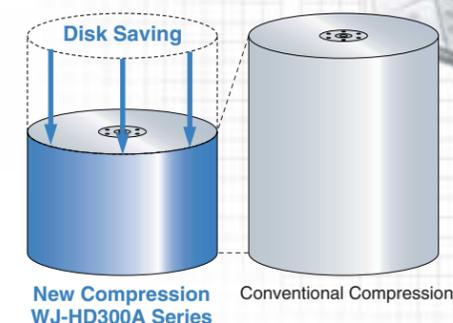

Picture Quality & Disk Saving

Compared to a conventional algorithm, the data compression ratio has improved approximately 1.5 ~ 2, depending on object and compression mode.

■ Data Size and Compression Mode

■ Comparison

All in One Solution

Instinctive Operation

Simple and instinctive, the functional base layout of the WJ-HD300A Series front panel is designed for ease-of-use. Eight (8)* directly connected Panasonic dome cameras can be controlled from the front panel. Also, the GUI based menu screen enables quick set up for flexible, more complex operations. (* Six (6) cameras for the WJ-HD309A)

OPERATION BASE LAYOUT

GUI BASE MENU

Value Added Features

The WJ-HD300A Series is equipped with the latest value added features to satisfy your requirements such as system reliability, operation efficiency, and cost savings.

Features include:

- High-density recording: 60 ips* (120 ips* @SIF)
- Full rate live multi screen: 60 ips*
- Simultaneous Live/Rec./Playback/Network
- 16 independent recording profiles
- Disk partitioning: Normal, Alarm, and Copy
- RAID 5 and mirror redundant recording
- Advanced VMD (Video Motion Detector): Area, vector, and duration.
- Various Network Operations: Live, PTZ control, Recording, Playback, and Downloading
- Network and serial open architecture

(* ips = image per second)

Superior surveillance made possible by state-of-the-art digital features.

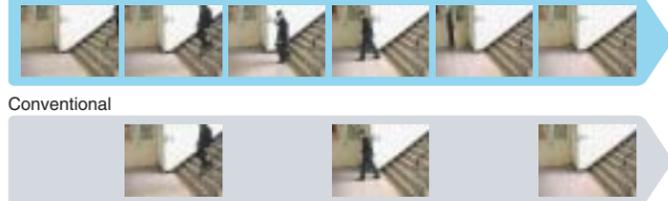

High-Refresh Rate Recording

High-speed digital processing enables high-refresh rate recording — to ensure critical moments are not missed.

Max. **30** image per sec. @ 720 x 480 (FRAME/NTSC)
 Max. **60** image per sec. @ 720 x 240 (FIELD/NTSC)
 Max. **120** image per sec. @ 360 x 240 (SIF/NTSC)

WJ-HD300A Series

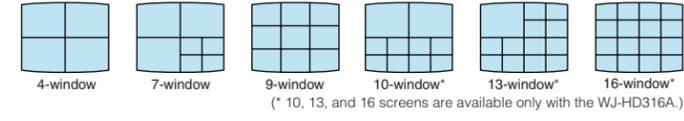

Full Rate Live Multi-Screen

Even when images from multiple cameras are displayed on a multi-screen, live monitoring can be achieved on all cameras at a full rate of 60 ips (image per second). Experience real-time, full surveillance with full-rate video images.

Multi-screen in versatile variations

16 Independent Recording Profiles

Flexible recording setup

Independent recording settings (recording mode/recording rate/picture quality) for each camera* enables flexible setup. (*16 cameras for the WJ-HD316A and 9 cameras for the WJ-HD309A.)

- **Recording mode:** Manual / Schedule / Event / Emergency
- **Recording rate:** Set the ips (image per second) as needed.
- **Picture quality:** Super Fine / Fine / Normal / Extended

User-friendly setup

The user friendly GUI supports easy and smooth setup while confirming current status graphically.

Instant Search and Playback

Filtered Search

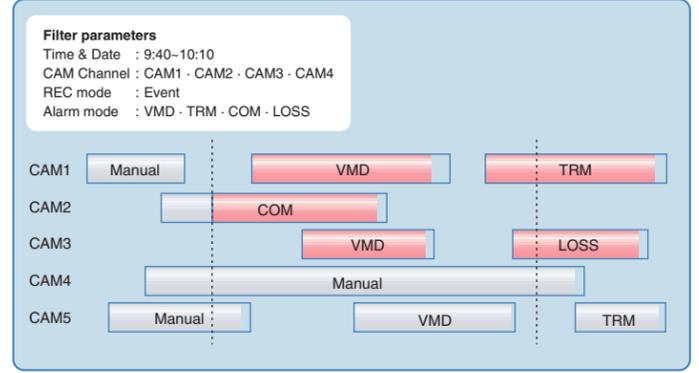

Various parameters/filters such as time & date, camera channel, REC events, text and VMD enables instant search and playback from mass recorded data.

* REC Event filter

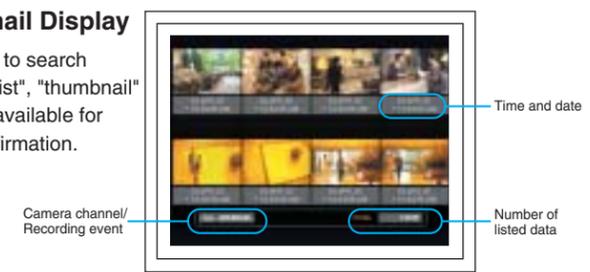

REC mode	Emergency, Event, Schedule, Manual
Alarm mode	VMD, Terminal, Command, Video loss

Filtered Search (Example)

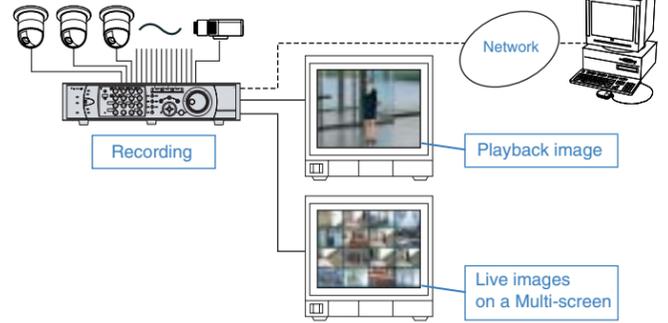

Thumbnail Display

In addition to search result by "list", "thumbnail" display is available for visual confirmation.

Live / Recording / Playback / Network Simultaneous Performance

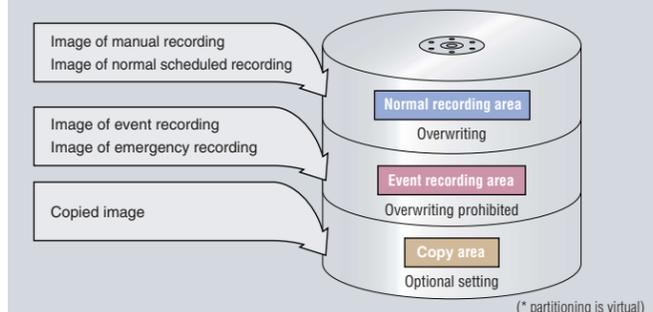

By adopting high speed signal processing, live / recording / playback / network can be operated simultaneously.

Disk Management

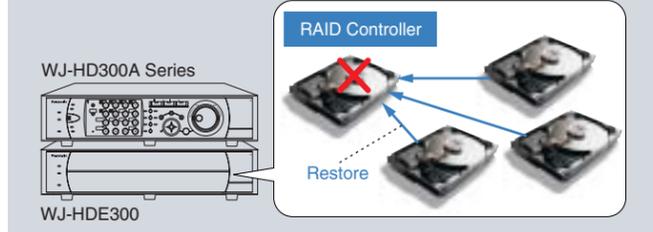

Hard Disk Partitioning Function* automatically selects the partition to be recorded.

The hard disk is divided into three partitions: "Normal Recording," "Event Recording," and "Copy." Image data is automatically recorded to the appropriate partition according to the recording mode. For the normal recording partition, the data is overwritten when the capacity is full. The event recording partition prohibits overwriting to protect data. Copy partition prepares data for retrieval to external medium.

RAID5 / Mirroring Function

RAID5 distributes image data to multiple hard disks in the extension unit. Upon hard disk breakdown, lost data can be restored from other hard disks. When using one WJ-HD300A Series unit, mirroring function is available for data backup.

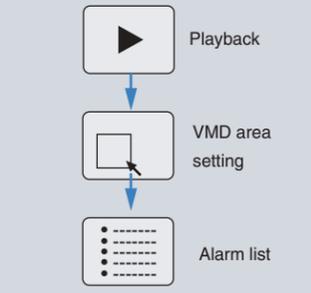

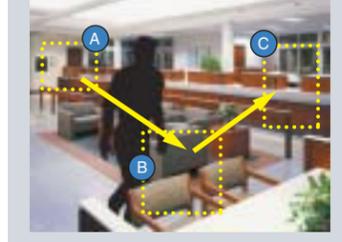

Advanced VMD

A new mode is added for sophisticated VMD detection.

Playback VMD

One VMD area can set one playback image for motion search.

DETECT VECTOR & DURATION

*The above all photographs were taken for the purpose of explanation ; actual images may differ.

System Scalability:

Viewing cascade connection (up to 4 main units)

Up to four (4) WJ-HD316A units can be cascaded to increase maximum 64 video inputs. All 64 cameras can be switched and viewed in live and playback from the master, while each slave unit has its own live viewing monitor.

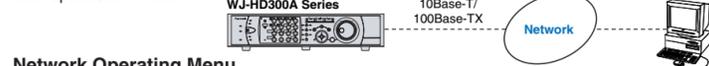

Expandable to 7.5 Terabytes (TB) storage

In addition to a total 500 GB capacity of the main unit WJ-HD316A/309A, one WJ-HDE300 extension unit provides up to 1.0 TB (1,000 GB). With seven (7) extension units, the maximum capacity can be extended up to 7.5 TB to satisfy long recording requirements.

Built-In Network Interface:

Network functions include live image monitoring through multi-screen display, camera PTZ control, recording/search/playback, downloading image/log data, e-mail notification, and setup data upload/download.

Network Operating Menu

Control Tab

The switcher function for live monitoring is operable.

Cam Tab

Remote control the camera selected on control tab page. (Only for 1-8ch Panasonic PTZ dome cameras)

HDD Tab

Operation for recorded images such as playback or downloading (saving) to PC.

Setup Tab

Setup of WJ-HD300A Series can be performed.

System Controller

WV-CU650

KEY FEATURES

• Controller for the WJ-HD300A Series of Digital Disk Recorders

Integrated System Control

Camera Control

- Detached joystick controls Pan/Tilt and Zoom, allowing seamless tracking.
- Larger numeric keypad provides direct access to cameras.

Recorder Control

- Jog Dial and Shuttle Ring for smoother control
- Dedicated Record, Play, and Search buttons

Switcher Control

- Image switching and sequencing buttons for Matrix System150

Easy to Operate While Focused on Surveillance

Universal Design for Right or Left Hand Use

- Detached joystick pad
- Layout with Jog Dial and Shuttle Ring in center

More Comfortable Extended Surveillance

- Soft padding on joystick
- Adjustable joystick height for large or small hands
- Designed with a low center of gravity and adjustable angle to minimize strain

Instinctive Operation

- Cockpit style button layout

System Management Capability

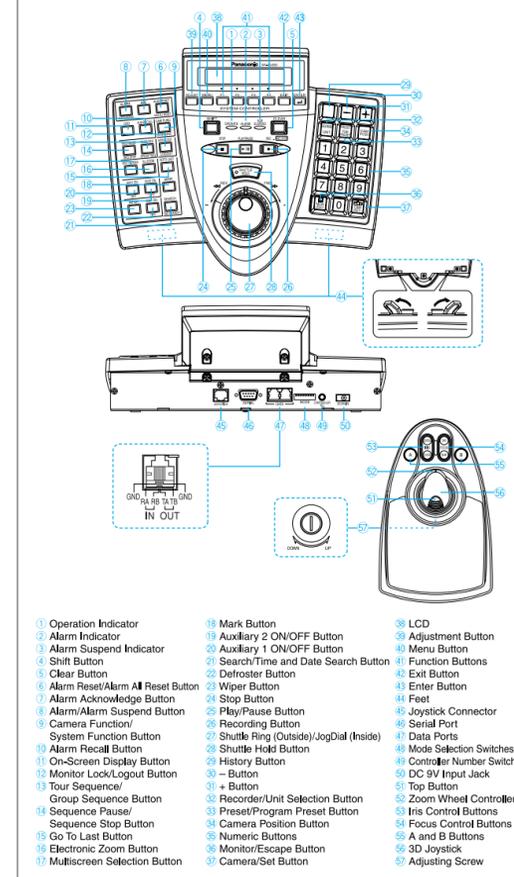

- User level management for registered users
- User assignable buttons: four in main unit plus three in palm rest
- Setup data can be transferred via RS485 to another WV-CU650.

SPECIFICATIONS (for WJ-HD300A Series)

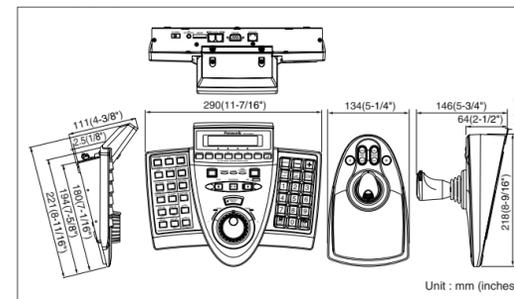

Power Source	9 V DC, 300 mA (using the supplied AC adapter)
Power Source (supplied AC adapter)	120 V AC, 60 Hz, 200 mA
Data Output/Input Port	6-conductor modular jack (RS-485, Full duplex) x2
Serial Port	9-pin D-sub connector
Controller Number	1 to 8 (rotary switch)
Ambient Operating Temperature	-10°C to +50°C (14°F to 122°F)
Unit Number Selection	Up to 16 (PS-Data)
Monitor Number Selection	1 to 2
Camera Number Selection	1 to 256 (up to 16 WJ-HD316A)
Dimensions (W x H x D)	Main Unit: 290 x 111 x 221 mm (11-7/16" x 4-3/8" x 8-11/16") 3D Joystick Unit: 134 x 146 x 218 mm (5-1/4" x 5-3/4" x 8-9/16")
Weight (without the AC adapter)	Main Unit: 1.3 kg (2.86 lbs.) 3D Joystick Unit: 0.8 kg (1.76 lbs.)

SPECIFICATIONS

WJ-HD300A Series Registration Capacity	up to 100 sets
User Registration Capacity	up to 32 users
User Types	5 types
Schedule Registration Capacity	up to 400 schedules
Favorite Registration Capacity	up to 500
Simultaneous Downloads	up to 10 accesses
Simultaneous Camera Image Displays	up to 16 cameras
Simultaneous File Playbacks	up to 4 files

*32 WV-AS60 users can be registered, however, accessing a single WJ-HD300A recorder at the same time, the maximum number is 4 users.

*Trademark and registered trademark

• Microsoft®, Windows® are registered trademarks of U.S. Microsoft Corporation or the corresponding Microsoft Corporation of another country. • Intel® and Pentium® are registered trademarks or trademarks of Intel Corporation of the U.S. or the corresponding Intel Corporation of another country and subsidiary companies. • Adobe®, Adobe logo, and Acrobat®, are trademarks of Adobe Systems Incorporated (Adobe Systems Co.). • Other company names and product names are trademarks or registered trademarks of the respective companies.

Main Application

Network mode

WV-AS60 operates the WJ-HD300A Series of Digital Disk Recorders remotely via the network.

- Facilitates monitoring live images captured by cameras connected to the recorder and camera operation.
- Makes possible the recording, search and playback of recorded images from multiple recorders.

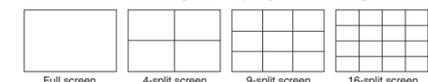

Local mode

WV-AS60 facilitates search, playback and management of image files downloaded on PC hard disk.

Downloader

WV-AS60 downloads images recorded on the disk recorder.

Displays four patterns (1, 4, 9, 16 screens) of recorded live images or playback images.

Main unit operation

There are a variety of operations that can be performed with the disk recorder alone: manually starting and stopping the recording, text attachment to recorded image, recorder log display, and data copying.

Three search functions

Three types of search functions are installed: recorded event search, playback VMD search, and marking search. A number of recorders can be searched simultaneously and required images can be retrieved quickly.

OPERATING ENVIRONMENT

This PC software can be installed in PCs with the following environments

OS	Microsoft® Windows® 2000 Professional SP4
Computer	Microsoft® Windows® XP Professional or Home Edition SP1
CPU	IBM PC / AT Compatible
Memory	Pentium® 4, 1.4 GHz or above
Hard Disk Capacity	512MB or above
Interface	About 40MB level is required for application installation.* 1024 x 768 pixel resolution level or above, HIGH color 16 bits or above (Full-color environment is recommended)
Web Browser	10 / 100Mbps network interface card installed Microsoft® Internet Explorer 6.0 SP1

*It is necessary to prepare space to receive files from the recorder that is separate from the application installation.
