

MOBILE PHONE APPLICATION QUICK SETUP GUIDE

How to add any GenIV device to the CLEARmobile phone application

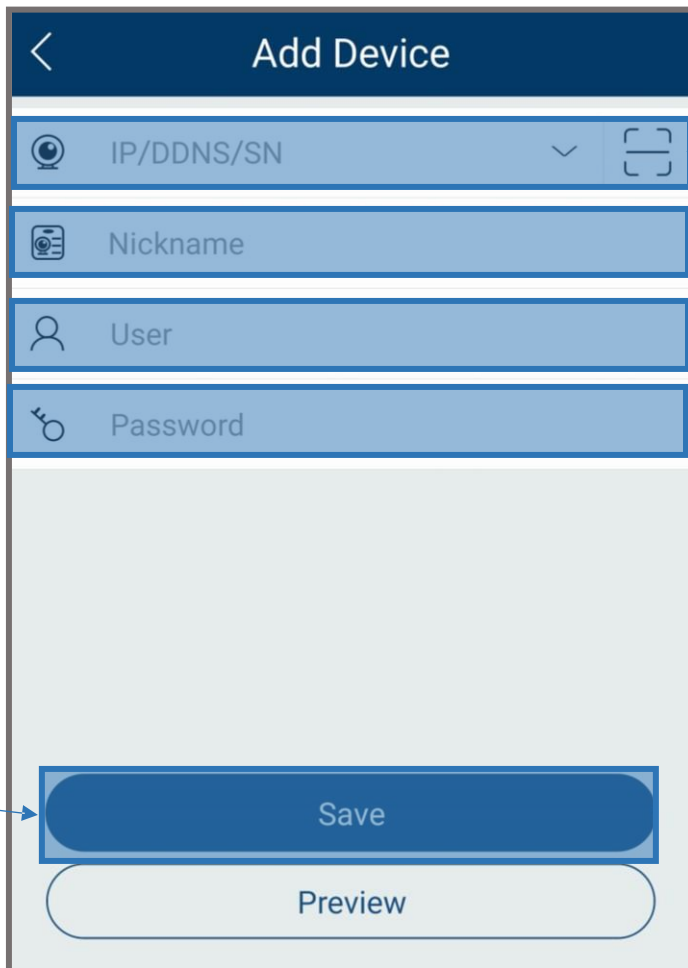

1. Download and install the CLEAR application to your mobile phone.
2. Double check and make sure your CLEAR device is online and available to be added to the application.
List to add a new device.
3. Select the menu icon located in the top left corner of the application and then select “**Server**

4. Within the Server List section select the plus sign to add a new device.

5. Fill in each field with the corresponding information matching your device
(Review example pic below for more info).

IP/DDNS/SN - Here you will input the IP address of your unit. When local to the unit you will use the devices IP address, when remote you will use the public IP address of the NVR's location of install.

Nickname - Here you will input what you'd like your NVR to be called within the app.

Username - Here you will input your username. Note: This will be the same as what is used locally at the device itself.

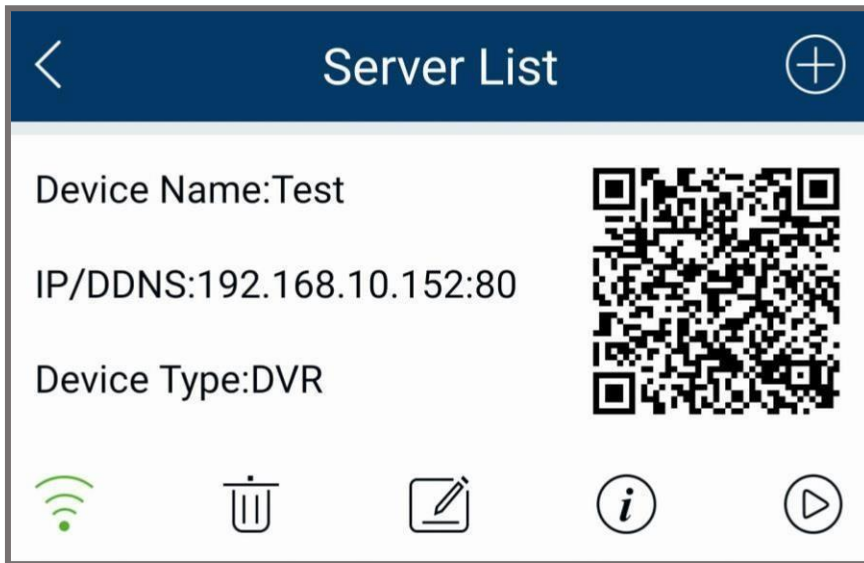

Password - Here you will input your password. Note: This will be the same as what is used locally at the device itself.

6. Select **Save** once all fields are filled in.

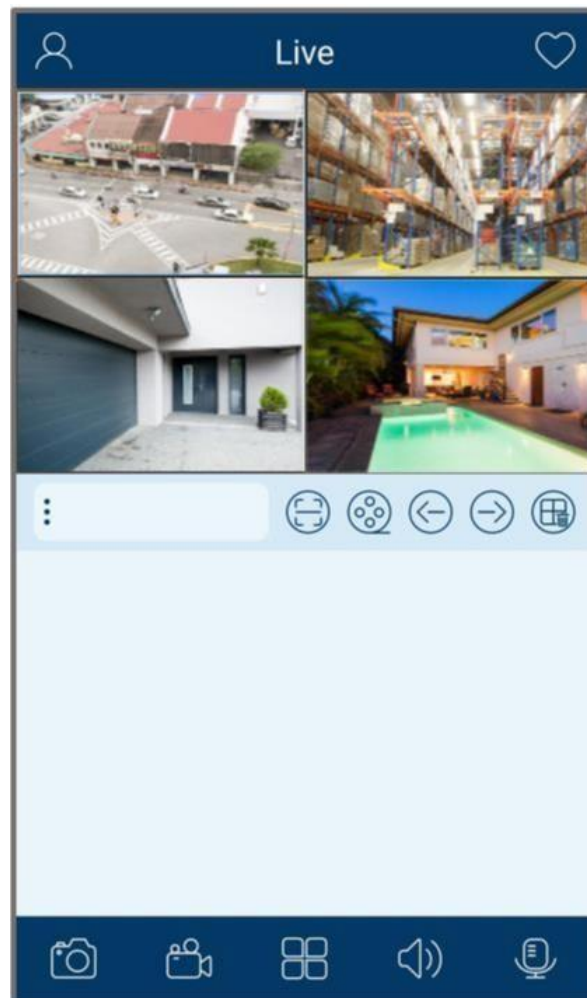

7. Once your device connects properly you will see a solid green Wi-Fi logo.

8. Select the play icon to review your live video.

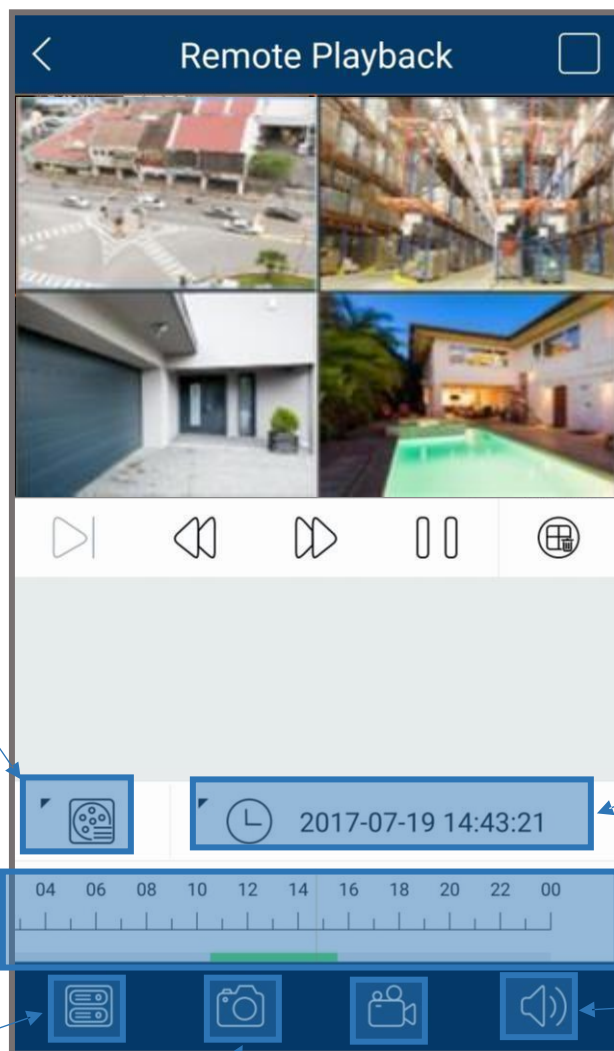

9. You should now see all of your available camera feeds.

How to Review Playback

1. To review your recorded video(s) via the application, simply select the playback icon beneath your live view feed. 
2. This will prompt the playback page where you can review your recorded footage. Reference image below.

Record Type – This option allows you to select which type of recording you'd like to

Record Bar – This option allows you to scroll through your recorded footage.

Device/Channel – This option allows you to select the device and channel(s) you'd like to review.

Snapshot – This option allows you to take a snapshot and save it to your mobile phone.

Record – This option allows you to record and save clips to your mobile phone.

Date – Here you can select the date/time of recorded footage you would like to review.

Audio – This option allows you to review audio recording if present
